

W.A.I.T.S and the environmental benefits of PQASSO

About the organisation

W.A.I.T.S. (Women Acting in Today's Society) specialises in working with women from BME groups and has been in operation since 1993. Our services include community organising, capacity building, domestic violence support and advocacy, ex-offenders resettlement, business start-up advice, and policy work.

What environmental benefits has PQASSO helped you to achieve?

PQASSO has highlighted the ways in which we could improve our environmental policies, and by implementing these changes we have seen benefits for the organisation and for the environment.

What steps have you taken to improve your environmental sustainability?

W.A.I.T.S. operates paper/plastic/metal and printer cartridge recycling. We also have an environmental policy detailing green travel ideas, economic printing and photocopying, and energy saving ideas amongst others.

What savings and efficiencies have you achieved in your use of resources?

We have seen a significant reduction in the amount of paper we are using.
